Il perfetto equilibrio tra materia e tecnologia ha generato questa linea di prodotti che fondono elevate caratteristiche tecniche con l'eleganza delle pietre naturali più ricercate. La pietra si trasforma da materia viva in materia altamente tecnologica, permettendo così di vivere in assoluta libertà gli spazi sia commerciali che residenziali. Materiali antiscivolo, resistenti al gelo e alla corrosione, e una vasta gamma di formati, permettono di realizzare molteplici superfici: terrazze, scalinate, facciate, ampi spazi aperti come giardini e porticati.

The perfect balance between material and technology has created this line of products that combines high technical specifications with the elegance of the most requested natural stone. The living essence of natural stone is captured and recreated as a highly technological material, allowing it to live in absolute freedom in commercial and residential spaces. The slip resistance, resistance to frost and corrosion (thanks to the wide range proposed) allows it to be utilised on many different surfaces: terraces, stairways, building facades, large open spaces such as gardens and porches.
